Notes

- **The start time has not changed.** Class still begins at 5:00 am East Africa time, which is 10:00 pm US Eastern and 9:00 pm US Central.
- **The finish time has changed.** Class 1 ends at the usual 7:30 am EAT. From Class 4 onward we run to 8:00 am EAT, thirty minutes longer, so that we cover as much content as possible this month.
- **Sunday carries three classes**, Classes 2, 3 and 4. Class 3 is the only one that falls in the East African evening. Please read those three rows carefully.
- **If you cannot make a class, do not worry.** Every class is recorded and goes up on your dashboard right after we finish, so you can watch it in your own time and come to the next class caught up. Nothing is ever lost.
- Schedules for Endocrine, Reproductive, Microbiology and General Pharmacology follow by the end of this week.
