

STARTS JUNE 1

USMLE Step 1 • Daily, Mon to Sun

Allan Bakesiga

MD (Makerere) • MScGH (Duke)

Past TA • Epi & Biostats (Duke)

PGY-1 Neurology, Creighton

WHAT WE'RE COVERING IN JUNE

CARDIOVASCULAR

10 days • Jun 1 – 10

- 01 Orientation, embryology & congenital heart defects
- 02 Anatomy & cardiac imaging
- 03 Cardiac output & PV loops
- 04 Heart sounds & murmurs
- 05 ECG & action potentials
- 06 CAD, IHD & myocardial infarction
- 07 Hypertension & atherosclerosis
- 08 Heart failure & cardiomyopathies
- 09 Endocarditis, myocarditis & vasculitis
- 10 Cardiovascular pharmacology

RESPIRATORY

8 days • Jun 11 – 18

- 01 Embryology, surfactant & congenital anomalies
- 02 Anatomy & muscles of breathing
- 03 Lung volumes & ventilation
- 04 Gas exchange & V/Q mismatch
- 05 Control of breathing & sleep apnea
- 06 Asthma & COPD
- 07 Restrictive disease, ARDS, pneumonia
- 08 TB, lung cancer & respiratory pharmacology

EPI & BIOSTATS

4 days • Jun 19 – 22

- 01 Study designs, evidence & diagnostic testing
- 02 Quantifying risk, transitions & survival analysis
- 03 Bias, confounding & effect modification
- 04 Statistical distributions, testing & CIs

GENERAL PATHOLOGY

8 days • Jun 23 – 30

- 01 Cellular adaptations & apoptosis
- 02 Necrosis, ischemia & free radicals
- 03 Acute inflammation
- 04 Chronic inflammation & repair
- 05 Neoplasia I — hallmarks & metastases
- 06 Neoplasia II — oncogenes & TSGs
- 07 Neoplasia III — markers & aging
- 08 General pathology review

HIGH-YIELD MATERIAL + TEST QUESTIONS *similar to exam day • every day*
